

## Mentors

### ANDREW GARNETT

Andrew Garnett is an architect who lives in London.

Since 1985, he has worked as a consultant for WHO, UNICEF, PATH and other agencies, specializing in immunization logistics.

He has contributed to a number of WHO guidance documents, most recently the *Model guidance for the storage and transport of time and temperature-sensitive pharmaceutical products*. He also writes and edits Performance, Quality and Safety specifications for cold chain equipment, and related issues.

Over the past ten years Andrew has participated in the development of the Effective Vaccine Store Management and Vaccine Management Assessment tools and guidelines.

His field experience includes work in Africa, Europe, Central Asia and Southeast Asia.

*"For me, as an architect," Andrew states, "working on the cold chain has presented me with a continuing series of fascinating design problems which I never tire of working on".*
